

Precise release
Improve the efficiency of body fat
mobilization in transition cows

Rumen-protected Choline Chloride
Menoco Plus

Choline Chloride
 $\geq 30\%$

Rumen bypass rate
 $\geq 90\%$

Intestinal release rate
 $\geq 90\%$

Improve the efficiency of body fat metabolism, ensure the effective energy supply

Reduce fat deposition in liver to maintain normal metabolic function and help glucose synthesis

Reduce the incompletely oxidation of NEFA in liver to reduce the production of ketone bodies

Usage

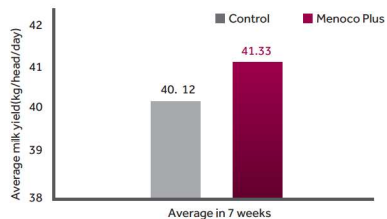

Dairy cow: 25-50grams/head/day
Beef cattle: 10-30 grams/head/day
Sheep: 5-10 grams/head/day

Product info

Shelf life: 24 months
Package: 25 kg/carton

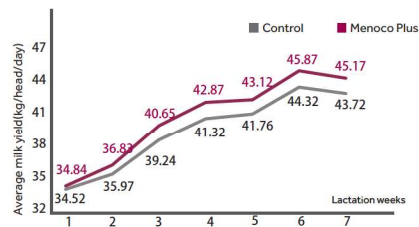

Effects of Menoco Plus on average milk yield

Average milk yield increased by 1.21 kg/head/day.
1482 kg milk increase for 25 dairy cows during 7 weeks.

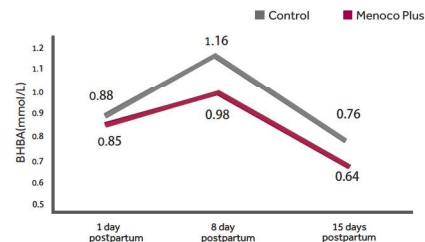

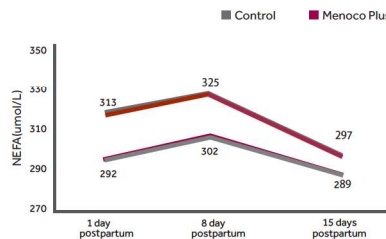

Effects of Menoco Plus on peak milk production

The peak milk was increased by 1.55 kg
It was predicted that 103 kg milk increase of a single cow in lactation period, then about 10 tons milk increase for 25 cows.

Effect of Menoco Plus on liver health in transition cows

MENON
